SOFT SKILLS

+ EMPATHY
+ TEAMWORK
+ CREATIVITY
+ ADAPTABILITY
+ OPEN-MINDEDNESS
+ PATIENCE
+ ACCEPTING CRITICISM

ABOUT ME

The world of technology has always interested me. When it was time to choose an area to study I already knew that it would have to be related to technology in some way. That is why in High School I chose Communication Design area, which allowed me to see different sides of communication design, making me even more fascinated.
In college, I continued my journey through the Degree in Multimedia Communication Technologies, challenging me in several aspects, from trying to have the most creative ideas through design, to have a logical thinking using programming languages. Deep down, I feel like I'm a little bit of all the areas I've studied. Even though Web Design and Web Development are my main focus, Graphic Design, Photography / Video and 3D Modeling will always have a special place in me. I feel that with my little journey I have already learned a lot, but I want to learn even more, every day, with new challenges.
